

Lighthouse (L/HEXTEND200)

Super Extender Inspection Light 200 Lumen

The Lighthouse Super Extender Inspection Light is a versatile 2 in 1 torch. Functions as a hand torch using its 3 Watt LED 150 lumens spot beam or as an inspection light utilising its slide out super-bright linear COB LED, that provides a powerful 200 lumens output floodlight, making it ideal for inspection work and general illumination. A magnetic base allows the light to be attached to metal surfaces for hands free use. This torch is an ideal choice for inspection engineers, mechanics, plumbers and any application that also requires a spot beam for distance location. Its compact size allows it to fit neatly into a toolbox, glove box or drawer. Depending on the output mode selected the lamp will provide up to five hours of continuous illumination. Requires 4 x AAA batteries (Supplied).

Battery Type

AAA Cell

Max. Lumen Output

200

Battery Supplied

Yes
